

TS500

Underwater Locating Device (ULD) Tester

Universal Tester

The TS500 is a universal ULD tester that supports the operational testing of Dukane Seacom's ULDs, which is required every 24 months, as specified in TSO-C121b.

The TS500 can test all Dukane Seacom ULDs, including legacy DK100, DK 120, DK130, and DK140 as well as the newer DK120/90, DK290, and DK180. It can also perform the required tests on aircraft while the ULD is mounted to the aircraft's Cockpit Voice and Flight Data Recorders.

The TS500 is made of durable plastic and includes a rugged carrying case plus three different test probes for the range of ULDs in service.

The TS500 replaces the TS200 and 42A12/1, which are now obsolete.

KEY FEATURES

- ▶ Compact & lightweight
- ▶ Supports all Dukane ULDs
- ▶ Easy-to-read LCD Display
- ▶ Multiple probes for legacy and new ULDs
- ▶ Uses one 9 VDC battery
- ▶ Weighs 17 ounces
- ▶ Measures 6.5 in. x 3.25 in. x 1.3 in.
- ▶ Can test both 37.5 KHz and 8.8 KHz ULDs
