Track the Vessel with
Ship's existing AIS
and access to valuable
features

- Tracking
- Fleet Management
- Live Weather Map
- Other helpful features

Falcon Mega Solutions provides the most robust Satellite AIS Vessel Tracking service, while enabling valuable features.

Increase the visibility of your Vessel by integration the AIS with Falcon Mega Track (Vessel Tracking System). Ship's existing AIS (Class-A) shall be used to access the valuable features.

Key Features:

- No additional Hardware is required; quick integration to Falcon Mega Track;
- Secure Access Credentials to the Log-In Vessel Tracking Platform;
- Graphical Position Reports of a Vessel and Fleet Overview on a single Map;
- Global Satellite-based AIS to manage your Fleet near-shore and on the high seas;
- Live Weather Map for passage planning and Weather routing;
- 24/7 Customer support;
- Fleet Location Report & Voyage Reports online, exportable to Excel;
- Track History for Voyage analysis (2 Years);
